The image shows the top view of a white, rectangular Electronics Under Test (EUT) unit. The unit is open, revealing internal components. On the left side, there are four black circular ports arranged vertically. In the center, there are two blue rectangular modules, each with a blue cap. To the right of these modules is a green printed circuit board (PCB) with various electronic components. On the right side of the unit, there is a vertical strip of connectors, including a green header and a black header. The unit is mounted on a white surface, and a power outlet is visible in the bottom left corner.
